Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109 IBSF File No. SAT-MOD-20101118-00239

Dear Ms. Dortch:

As a user of high-precision GPS and Real-time Kinematic (RTK) services provider, John Chance Land Survey, Inc. (JCLS) opposes LightSquared's request (which we are aware ignores the recent independent test results) to affirm its license and its request to go forward with its plan.

For your information, for the past 20 years JCLS has been involved in providing high-precision GPS services to the Federal, State and local government agencies in support of projects such as the Periodic Inspection of Civil Engineering Structures (PICES) for the Mobile District USACE, Coastal Restoration Projects for the Louisiana Department of Natural Resources, Office of Coastal Protection and Restoration, U.S. Fish & Wildlife Services, Louisiana Wildlife & Fisheries, Tennessee Valley Authority, installation of deep rod monuments high-precision vertical surveys for National Geodetic Surveys and NOAA, to name a few. The primary means of data collection for all these projects was high-precision GPS.

I sincerely believe that if LightSquared's request for licensing is accepted, the health, safety and welfare of the GPS survey community and society would be greatly affected. I urge the FCC to deny LightSquared's request.

If you have any questions, please call my direct line at 337 268-3151 or fax me at 337 268-3281.

Sincerely,
JOHN CHANCE LAND SURVEYS, INC.
